

C Logistics Solutions, SRL, founded in 2004 in the Dominican Republic is a full-service freight forwarder, structured and with extensive experience to comply and meet the requirements of today's global transportation industry, focusing on the specific logistical needs of our clients and business associates.

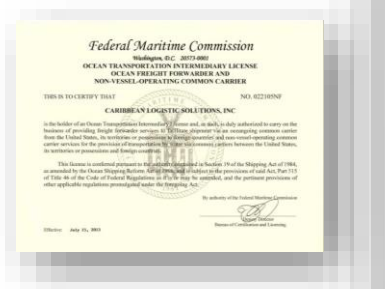

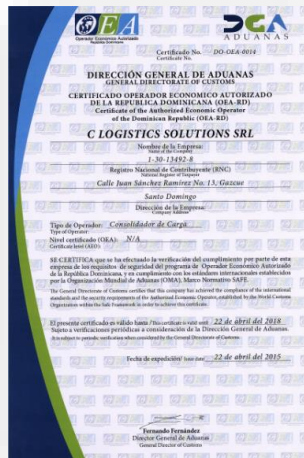

Our US office, Caribbean Logistics Solutions, located in Miami, is duly registered and licensed by the Federal Maritime Commission as an NVOCC and certified by the TSA as an IAC with warehousing. Additionally, our Procurement Office, Cronos Trading and Services is also located in Miami.

Apart from offering complete services as a freight forwarder with 'in-house' customs brokerage, we specialize in the handling of projects and their cargoes. Our management and operations team offer support services, with physical presence, both at the project sites and the ports & airports to ensure the efficient handling, dispatch and reception.

# CERTIFICATIONS:

We are certified as an Authorized Economic Operator (AEO) and the Business Alliance for Secure Commerce (BASC), as well as certified by the The International Cyanide Management Code. Additionally we have all the local Government permits of the Dominican Republic to handle dangerous goods.

# LOGISTIC CENTERS

With all the available shipping lines and airline services, the Dominican Republic is considered to be very attractive as a local distribution center, as well as for the entire Caribbean basin and the Americas due to its geographic location, structure, and products that can remain in the logistics centers for a year without paying duties, taxes, or fees.

Depending on the destination, there are weekly departures available, with transit times to anywhere in the Caribbean from 2 to 8 days. This can reduce overall transit time from the Far East or Europe to Caribbean destinations by up to 10 days (or more).

Among the services offered in the logistics centers:

- Complete storage: consolidated, re-export, local market, and free zone
- Customs procedures / manifest controls
- Controlled storage under room temperature
- Inventory management: immediate with logistics platform (WMS)
- Pick up and load orders
- Labeling (for local markets, language requirements, etc.)
- Compliance with safety, health, environment, and safety regulations
- Express delivery
- Cross-docking
- Transportation management

## Office Santo Domingo Airport (SDQ)

Our new premises are in the recently opened business building of the Las Américas International Airport; this is 5 minutes from the passenger terminal; 15 minutes from the Multimodal port of Caucedo and about 45 minutes from the capital city Santo Domingo.

Our main air services include:

- Air transport of goods specialized for large scale projects, from and to any part of the world.
- Urgent services, parcel and courier.
- Commercial Agreement with DHL / UPS for better Courier rates
- Process and logistics service for the receipt and / or shipment of accompanied luggage
- Warehouse reception at the Airport.
- Counter available for reception and urgent documentation.
- Door to door , door to airport , airport to door services.
